

Target: <https://gitee.com/jspxcms/jspxcms>

Version: v10.2.0

Cross-site scripting vulnerability exists in /ext/collect/filter_text.do

source passes poclink

In filter_text.do

```

    }

    @RequestMapping(value = "/filter_text.do")
    public void filterText(String source, String filter, HttpServletResponse response) {
        List<Pattern> patterns = CollectField.getFilterPattern(filter);
        String result = CollectField.applyFilter(patterns, source);
        Servlets.writeHtml(response, result);
    }

    @RequestMapping(value = "/fetch_url.do")
    public void fetchUrl(String url, String charset, String userAgent, HttpServletResponse response) {
        String source;
        try {

```

successed
